

# Efficient & Reliable Gearmotors

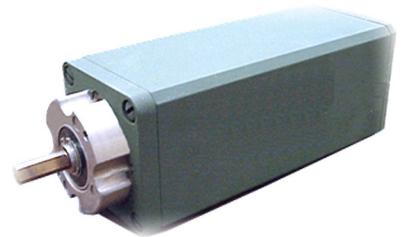

## Over 30 Years of Excellence in Motor Solutions

- Robust
- High quality
- Wide variety of Brake-by-Wire applications

## Achieve high torque levels in a small package.

Heat-treated, precision-cut 8620 steel gears and a gas-nitrided, stressproof steel gear housing to accommodate extensive cycling (over 54,000 actuations) for up to 850 in-lbs of torque.

## Motor design with efficiency in mind.

Precision-wound armature provides the power to drive the gearbox and actuate the chain-driven EPB device every time.

## Custom Gearmotors
